

March 23, 2017

To the Board of Directors
Livingston County Capital Resource Corporation

In planning and performing our audit of the financial statements of Livingston County Capital Resource Corporation as of and for the year ended December 31, 2016, in accordance with auditing standards generally accepted in the United States of America, we considered the Corporation's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Corporation's internal control. Accordingly, we do not express an opinion on the effectiveness of Corporation's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses. Given these limitations during our audit, we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

This communication is intended solely for the information and use of management, Board of Directors, and others within the organization, and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

EFPR Group, CPAs, PLLC
